For Brabender farinograph formulation. R. S. Bailey	701
For measuring bread staling. W. H. Cathcart	104
For the determination of nonprotein nitrogen in soybean meal. H. C. Becker, R. T. Milner, and R. H. Nagel	447
Formulation of farinograph curves. R. S. Bailey	701
Measurement of compressibility of bread crumb. W. Platt and R. Powers ..	604
Modified Bailey-Johnson method for gas production. R. C. Sherwood, F. C. Hildebrand, and B. A. McClellan	621
Nonprotein nitrogen in soybean meal. H. C. Becker, R. T. Milner, and R. H. Nagel	448

	Page
Polariscopic determination of proteolytic activity. Q. Landis	468
Pressuremeter for yeast study. J. M. Doty and W. R. Urban	44
Rapid method for flour pigments. D. S. Binnington	639
Steeping in laboratory malting. J. A. Anderson and W. O. S. Meredith ..	66
Viscosity of gluten dispersion. R. H. Harris and J. Johnson, Jr.	207
Volumetric method for gas production in yeast fermentation. S. Eisenberg	431
Milk	
Effect of, on bromate requirement of flour. S. Eisenberg	476
Effect of, on bromate response of flours. C. W. Ofelt and R. K. Larmour	1
Milling	
Factors as affecting diastatic activity. E. Ziegler	668
Starch damage in, as related to diastatic activity. C. R. Jones	133
Milner, R. T., H. C. Becker, and R. H. Nagel. A method for the determination of nonprotein nitrogen in soybean meal	447
Mixing curves	
Effect of autolysis on. C. O. Swanson	679
Formulation of. R. S. Bailey	701
Modification of the Bailey-Johnson method for measurement of gas pro- duction in fermenting dough. R. C. Sherwood, F. C. Hildebrand, and B. A. McClellan	621
Moisture	
Content and growth of mould in flour, bran, and middlings. E. C. Barton- Wright and R. G. Tomkins	332
Content in relation to mould growth in flour, bran and middlings. E. C. Barton-Wright and R. G. Tomkins	332
Methods, aluminum plate and air-oven methods compared. C. W. Ofelt ..	650
Methods, aluminum plate for whole wheat. H. W. Putnam and C. E. Jolitz	653
Montzheimer, J. W., Chairman. Report of the 1938-39 subcommittee on meth- ods of testing cake flours	392
Mould growth in milling products, relation of moisture content to. E. C. Barton-Wright and R. G. Tomkins	332
Munz, E., and C. W. Brabender	
Extensograms as a basis of predicting baking quality and reaction to oxi- dizing agents	313
Nagel, R. H., H. C. Becker, and R. T. Milner. A method for the determination of nonprotein nitrogen in soybean meal	447
Naylor, N. M., J. M. Newton, and F. F. Farley. The use of soybean beta- amylase to follow the modification of starch	342
New flour test: the "dextrin figure." D. W. Kent-Jones and A. J. Amos ...	265
Newton, J. M., F. F. Farley, and N. M. Naylor. The use of soybean beta- amylase to follow the modification of starch	342
Nonprotein nitrogen, method for, in soybean meal. H. C. Becker, R. T. Milner, and R. H. Nagel	447
North Dakota durum wheats, quality of. R. H. Harris and D. Knowles	480
Note on modification of the A. A. C. C. methods for the determination of total and residual CO ₂ in baking powders and total CO ₂ in self-rising flours. R. A. Barackman	659
Nutritive value of the proteins of rice and its by-products. II. Effect of amino acid additions on growth. M. C. Kik	473
Oat hulls, hemicelluloses in. P. W. Krznarich	457
Ofelt, C. W. A comparison between the official air-oven method and the rapid aluminum-plate method	650
Ofelt, C. W., and R. K. Larmour. The effect of milk on the bromate require- ments of flours	1
Ofelt, C. W., R. K. Larmour, and E. B. Working. Quality tests on soft red winter wheats of Kansas	18
Ofelt, C. W., and R. M. Sandstedt	
A varietal study of the relation between protein quality and protein content	714
An apparent relationship between protein content and rate of proof	707
Oxidation of glutathione and its effect on dough. E. Ziegler	556

	Page
Oxidizing agents	
Action of, on flour. B. Sullivan, M. Howe, F. D. Schmalz, and G. R. Astleford	507
Reaction of, in baking, as predicted by extensograms. E. Munz and C. W. Brabender	313
Pan, for test baking, design of. M. C. Markley	387
Plasticity	
Measurement of, for predicting baking value. E. Munz and C. W. Brabender	78
Of doughs. O. E. Stamberg and C. H. Bailey	37
Plastometer, diagram of. O. E. Stamberg and C. H. Bailey	38
Platt, W., and R. Powers. Compressibility of bread crumb	601
Polariscopic determination of proteolytic activity. Q. Landis	468
Powers, R., and W. Platt. Compressibility of bread crumb	601
Prediction of baking value from measurements of plasticity and extensibility of dough. I. Influence of mixing and molding treatments upon physical dough properties of typical American wheat varieties. E. Munz and C. W. Brabender	78
Preliminary study of eight test methods (1938-39 subcommittee on methods of testing cake flours). F. J. Coughlin and D. Wade	257
Pressuremeter	
For study of yeast. J. M. Doty and W. R. Urban	44
Production of mechanically damaged starch in milling as a governing factor in the diastatic activity of flour. C. R. Jones	133
Proof rate as related to protein content. C. W. Ofelt and R. M. Sandstedt ..	707
Proteases, effects of, on mixing curves. C. O. Swanson	690
Protein	
Content as related to protein quality. R. M. Sandstedt and C. W. Ofelt ..	714
Content as related to rate of proof. C. W. Ofelt and R. M. Sandstedt	707
Films and the susceptibility of raw starch to diastatic attack. R. A. Gortner and C. Hamalainen	378
Of rice, nutritive value of. M. C. Kik	473
•Quality as related to protein content. R. M. Sandstedt and C. W. Ofelt ..	714
Proteolytic	
Activity, comparison of methods for. F. C. Hildebrand	635
Activity, polariscopic determination of. Q. Landis	468
Enzymes, effect of, on viscosity of gluten. R. H. Harris and J. Johnson, Jr.	203
Punjab wheat, biochemical and technological study of. R. Singh and C. H. Bailey	169
Putnam, H. W. Report of the 1938-39 committee on methods of testing soft wheat	259
Putnam, H. W., and C. E. Jolitz. Determination of moisture in flour and ground wheat—a collaborative comparison of the official air-oven and rapid aluminum-plate methods	653
Quality	
Studies on North Dakota durum wheats (1938 crop). R. H. Harris and D. Knowles	480
Tests on soft red winter wheats of Kansas. R. K. Larmour, E. B. Working, and C. W. Ofelt	18
Reducing agents, action of, on flour. B. Sullivan, M. Howe, F. D. Schmalz, and G. R. Astleford	507
Relation	
Between the normal farinogram and the baking strength of western Canadian wheat. W. F. Geddes, T. R. Aitken, and M. H. Fisher	528
Between wheat malt dosage, flour diastatic activity, and gassing power. F. C. Hildebrand and W. F. Geddes	626
Report of	
1938-39 committee on methods of analysis. R. M. Sandstedt	129
